# **ABOUT LAUNDRY APP**

Laundry Booking app provide convenient solutions for busy individuals. They allow users to schedule pickup, track orders, and receive clean laundry at their doorstep.

Mostly, A laundry service is used in a hotel that washes and irons clothes for guests. Almost all hotels have a laundry service. If you hand in clothes one day you should get them back a day or two later. The laundry service will wash, dry, and iron your clothes.

## OBJECTIVE OF LAUNDRY APP

The main objective is to connect the laundry services and customers by providing quick and comfortable services at the appropriate time.

A laundry booking app typically aims to streamline the process of scheduling and managing laundry services for users.

## **01. User-Friendly Interface**

The app should have an intuitive design for easy navigation and order placement.

## **03. Scheduled Delivery**

Allow users to select convenient time slots for pickup and delivery of their laundry.

## **02. Order Tracking**

Real-time tracking of the laundry order, from pickup to delivery, keeps users informed.

# **KEY FEATURES OF LAUNDRY APP**

# WHY FIREBASE AS A DATABASE?

Firebase, a platform developed by Google, offers a range of services that can be effectively utilized in the development of a laundry app. Here's how Firebase can be leveraged in various aspects of a laundry app
